

Hugging Face Setup Guide

Setting up access to SAM3 & DINOv3 models via ICICLE/Tapis

Overview

This guide walks you through creating a Hugging Face account, requesting access to gated models (SAM3 and DINOv3), generating an access token, and integrating it with ICICLE/Tapis. Follow all steps in order — each step depends on the previous one.

Step 1 — Create a Hugging Face Account

Hugging Face is the central hub for open-source AI models and datasets. You will need a free account to access models, request permissions, and generate API tokens.

- Go to <https://huggingface.co> and click "Sign Up".
- Enter your email, choose a username and password, and verify your email.
- Complete your profile (name, organization if applicable).

<https://huggingface.co>

 **Tip:** Use a professional or institutional email address — it improves your chances of approval for gated models.

If you already have an account, simply log in and proceed to Step 2.

Step 2 — Request Access to SAM3 and DINOv3

SAM3 and DINOv3 are gated models hosted by Meta on Hugging Face. You must agree to usage terms and request access before you can download or use them.

Requesting Access to SAM3

- Open the SAM3 model page:

<https://huggingface.co/facebook/sam3>

- Click "Request Access" and fill in your details (name, affiliation, job title, date of birth).

- After submitting, you will see a confirmation message that your request is pending review.

- Once approved, the model page will show 'Gated model — You have been granted access to this model'.

You must request access to SAM3 and DINOv3 separately. Approval for one does not grant access to the other.

💡 Tip: You will receive an email when approved. Check your spam folder if you don't see it after 24 hours.

Requesting Access to DINOv3

- Open the DINOv3 model page:

<https://huggingface.co/facebook/dinov3-vitl16-pretrain-lvd1689m>

- Repeat the same access request process as for SAM3 above.

Step 3 — Generate a Hugging Face Access Token

Once your model access requests are approved, you need to generate an API access token. This token acts as your authentication credential when downloading models programmatically.

How to Generate a Token

- Navigate to your Hugging Face token settings:

<https://huggingface.co/settings/tokens>

- Click "+ Create new token".
- Set the Token Type to "Read" and give it a descriptive name (e.g., ICICLE-Tapis-Access).

- Click "Create token". Copy the token immediately — it will only be shown once.

Treat your token like a password. Do not share it publicly or commit it to a repository.

💡 **Tip:** If you lose your token, revoke it and generate a new one from the same settings page.

Step 4 — Add Token in ICICLE / Tapis

With your token generated, you can now integrate it with ICICLE/Tapis to enable authenticated access to Hugging Face models from within the platform.

- Log in to your ICICLE/Tapis account or portal.
- Navigate to the Secrets or Credentials section of your profile or project settings.
- Find the Hugging Face Token field and click "Add" or "Update".
- Paste your copied Hugging Face token into the field and save.

The exact location of the token field may vary depending on your ICICLE portal version. Contact your system administrator if you cannot locate it.

Quick Reference Summary

- Step 1: Create a Hugging Face account at huggingface.co
- Step 2: Request access to facebook/sam3 and facebook/dinov3-vitl16-pretrain-lvd1689m
- Step 3: Generate a Read token at huggingface.co/settings/tokens
- Step 4: Add the token to your ICICLE/Tapis credentials

All four steps are required and must be completed in order.
